

Addressing Health & Safety Aspects in Development Projects

*This initiative is proudly supported by
BD ES Learning Center*

This advanced workshop aims to align institutional priorities and strengthen governance practices while ensuring health and safety are systematically integrated into development planning. Through practical exchange and strategic dialogue, it will drive actionable solutions for mainstreaming health and safety in development initiatives

October 15, 2025

9:00 AM - 1:30 PM

ITN Seminar Room, ARI-
ITN Building (5th Floor),
BUET, Dhaka-1000

Objectives

- Highlight the importance of occupational and community health and safety in construction works.
- Share experiences and lessons learned from recent development projects in Bangladesh.
- Define the roles of government agencies in EIA preparation, review, and clearance.
- Clarify agency responsibilities in enforcing health and safety during implementation.
- Identify gaps, overlaps, and challenges in existing policies, practices, and institutional roles.

Expected Outcomes

- Develop a preliminary roadmap for strengthening health and safety frameworks in development projects.
- Bridging DoE and DIFE to enhance integration of health and safety in EIA preparation and implementation.
